3A. Adequacy of Disclosure Requirements - Cross cutting standards (1/2)

For the purpose of the questions included in this section, respondents are encouraged to consider the following:

- when sharing comments on a given Disclosure Requirement, and as much as possible, reference to the specific paragraphs being commented on should be included in the written comments,
- in the question asked, for each ESRS, about the alignment with international sustainability standards, these include but are not limited to the IFRS Sustainability Standards and the Global Reporting Initiative Standards. Other relevant international initiatives may be considered by the respondents. When commenting on this particular question, respondents are encouraged to specify which international standards are being referred to.

A complete index of Disclosure Requirements and their corresponding Application Guidance can be found in Appendix I – Navigating the ESRS.

DR 2-GR 1 – General characteristics of the sustainability reporting of the undertaking

The undertaking shall give general information about (i) its sustainability report, and (ii) the structure of its sustainability statement.

The principle to be followed under this disclosure requirement is to give the necessary context of the sustainability reporting of the undertaking.

Q1: Please, rate to what extent do you think DR 2-GR 1 – General characteristics of the sustainability reporting of the undertaking

For part E, please explain why costs would be unreasonable and / or what particular benefit this disclosure requirement offers

For part F, please specify what existing European sustainability reporting obligation you think the disclosure requirements misses to address adequately

For part G, please explain how you think further alignment could be reached

Please share any comment and suggestion for improvement you might have relating to the above questions, referring explicitly to the part of the question you are providing comment to

We propose to ensure a better alignment of the terms and definitions with other standards, e.g. the term "businesscard" is not clear.

DR 2-GR 2 – Sector(s) of activity

The undertaking shall provide a description of its significant activities, headcount and revenue.

The principle to be followed under this disclosure requirement is to allow an understanding of the distribution of the undertaking's activities by reference to a common sector definition.

Q2: Please, rate to what extent do you think DR 2-GR 2 – Sector(s) of activity

We find that this DRs is redundant, as financial reporting normally already provides this information.

DR 2-GR 3 – Key features of the value chain

The undertaking shall describe its value chain.

The principle to be followed under this disclosure requirement is to provide an understanding of the value chain in which the undertaking operates, from the initial inputs into a product or service, in the upstream supply chain, to its downstream delivery to end-users, including ultimate disposal, recycling or reuse for physical products.

We note that the level of detail of the required information determines whether a reasonable cost / benefit balance is reached.

We recognize the importance of this item, however, we think that reporting might be difficult for first starters.

We note that it does not make sense to start with value chain consideration and that the reporting about business model and strategy should come first. We, therefore, think that reordering the DRs is necessary.

We recommend considering the introduction of a sweeping clause.

DR 2-GR 4 – Key drivers of the value creation

The undertaking shall describe how it creates value.

The principle to be followed under this disclosure requirement is to provide an understanding of the key drivers of value creation the undertaking is leveraging to contribute to the overall performance of the value chain it operates in taking account of the respective interests of all stakeholders.

DR 2-GR 5 – Using approximations on the disclosure in relation to boundary and value chain

Following the principle on boundaries and value chain of ESRS 1 when the undertaking has used peer group information or sector data to approximate missing data due to impracticability, it shall disclose:

1. Its basis for preparation for the relevant disclosure and indicators, including the scope for which an approximation has been used; and
2. The planned actions to reduce missing data in the future.

Approximations might be very judgemental. We recommend to disclose the approximations calculated on a qualitative and quantitative basis in order to provide sufficient information.

DR 2-GR 6 – Disclosing on significant estimation uncertainty

Following the principle of estimating under conditions of uncertainty in ESRS 1, the undertaking shall:

1. identify metrics it has disclosed that have a significant estimation uncertainty, disclose the sources and nature of the estimation uncertainties and the factors affecting the uncertainties, and
2. identify and disclose the sources of significant uncertainty and the factors affecting these sources of uncertainty when explanations of possible effects of a sustainability factor relate to possible future events about which there is significant outcome uncertainty.

We note that references to IFRS should be made and that the basis and principles of reporting should be summarized.

DR 2-GR 7 – Changes in preparation and presentation

Following the principle on changes in preparation or presentation of ESRS 1, the undertaking shall explain changes in preparation and presentation by disclosing:

1. the description of the methodology used for the restatement;
2. the difference between the amount reported in the previous period and the revised comparative amount in case of quantitative metrics;
3. the reasons for the change in reporting policy; and
4. if it is impracticable to adjust comparative information for one or more prior periods, the undertaking shall disclose this fact and the reason why.

We recognize that consistency is good, but only to the extent that changes are material. Therefore, we would recommend adding materiality as constraint e.g. "the undertaking shall explain [material]* changes in preparation and presentation".

We suggest to define what is a change and how to proceed in such a case. The regulations of IAS 8 "Accounting and valuation methods, changes in estimates and errors" can be of help in this matter.

Otherwise, undertakings might spend their time reworking numbers for little benefit as users, such as external analysts, do not continuously adjust and re-populate their models, unless there is some benefit. Moreover, undertakings might be tempted to reduce data quality if users view the numbers as being something that will be adjusted in the future.

We find the meaning of "changes in preparation" unclear. If this wording refers to a change in the method used to estimate/calculate quantitative data, it might be better to be more precise. Furthermore, we suggest that only high-level method changes are relevant, e.g., a change in high-level formulas (i.e., those that are at least of a second order). A change in estimates should not be considered a change in preparation (methodologies) so that a restatement would not be necessary.

Moreover, if new methodologies are applied to previously undisclosed data, we find that there should be no need to restate any data that have never been stated.

DR 2-GR 8 – Prior period errors

Following the principles on errors in ESRS 1, if applicable, the undertaking shall disclose the following for prior period errors:

1. the nature of prior period errors;
2. for each prior period disclosed, to the extent practicable, the amount of the corrections; and
3. if retrospective restatement is impracticable for a particular period, the circumstances that led to the impracticability and a description of how and when the error was corrected.

Although we prefer a principle-based approach for sustainability reporting, guidance that is more detailed would be helpful for the subjects of restatement or prior period errors. For example, IFRS has provided such a guidance with the standard IAS 8, a clear guidance on such a sensitive issue as error correction. EFRAG should consider an own standard for restatement and prior period errors, as clear rules are helpful when correcting errors.

DR 2-GR 9 – On other sustainability reporting pronouncements

The undertaking shall disclose if it also reports in full or in part in accordance with generally accepted sustainability reporting pronouncements of other standard setting bodies and non-mandatory guidance including sector-specific, in addition to its report prepared according to ESRS. It shall disclose if such reporting is included in its sustainability statements.

We note that the term “pronouncement” is not clear and defined.

Regarding the referencing and acknowledgment of other verified reports it is unclear if the reference is just an information about other reports, or a cross-reference to other standards.

DR 2-GR 10 – General statement of compliance

The undertaking shall provide a statement of compliance with ESRS.

The principle to be followed under this disclosure requirement is to inform the users about the compliance with ESRS requirements, following mandated disclosure requirements complemented by entity-specific disclosures.

We note that the meaning of compliance (in terms of scope) is currently still unclear. We are not sure, if the companies concerned should also make a general statement on (legal) compliance (Alignment with EMAS Reg. where statement on legal compliance is required).

As compliance is provided by statutory auditors and audit firms, we think that statements of compliance by undertakings are useless. Therefore, we think that DR 28 – 30 could be deleted.

DR 2-SBM 1 – Overview of strategy and business model

The undertaking shall provide a concise description of its strategy and business model as a context for its sustainability reporting.

The principle to be followed under this disclosure requirement is to provide relevant contextual information necessary to understanding the sustainability reporting of the undertaking. It is therefore a reference point for other disclosure requirements.

Article 19a of the CSRD regulation requires the description of the undertaking's business model and strategy including the resilience of the business model and strategy to risks related to sustainability matters. This requirement is also in line with the regulatory requirements of the ECB's Guide on climate-related and environmental risks. This reporting requirement will also increase transparency and contribute to investor's trust as well as increase the ESG ratings of an undertaking. The disclosure obligation is also in line with the European Green Deal (Action Plan on financing Sustainable Growth).

The aim of the European Green Deal is the reorientation of capital flows towards a more sustainable economy (Green transition) and to reduce GHG emissions and reach climate neutrality by 2050. One of the key actions of the European Green Deal is fostering transparency (strengthening sustainability disclosure). Besides the CSRD and ECB Guidance the reporting obligation also addresses Taxonomy Art 8.

We note that the reordering of the DRs is necessary. We think that the information on SBM should be placed before the information on the value chain in order to enable a logical reading order. As the description of the value chain is purely descriptive, we think that a verification of this information may be difficult.

It would be interesting to disclose a breakdown of the value added over geographical regions.

The explanation of the value chain and the description of the "business model" should be unified. Clearer requirements for disclosing the strategy and business model would be important.

We propose that, if necessary, this disclosure requirement can be merged with that from Q12.

Mandatory (data) requirements should be provided in the standard text and not in the annex. We critically note that at the moment the SBM part consists of many "shall" requirements in the annex.

DR 2-SBM 2 – Views, interests and expectations of stakeholders

An undertaking shall describe how the views, interests and expectations of its stakeholders inform the undertaking' strategy and business model.

In a mid-term and long-term view, we see benefits as there is a growing demand from stakeholders to assess the potential impact resulting from the integrated strategy across the value chain of the undertaking.

As a well-established standard for sustainability reporting already exists, we would recommend an even higher degree of alignment with GRI (inside-out impact). For financial materiality (outside-in) we share the need for additional disclosures.

We note that 'resilience' is an abstract concept, making it difficult to be verified. Resilience is certainly closely linked to the assessment of opportunities and risks.

DR 2-SBM 4 – Interaction of risks and opportunities and the undertakings' strategy and business model

The undertaking shall describe the interaction between its material risks and opportunities and its strategy and business model.

IFRS sustainability standards do not require such governance information, and it is doubtful that they will do so in the future, when they are more fully developed. The GRI requirements are much less detailed than those in this disclosure requirement.

We think that the DR GOV in ESRS 2 in the current form should be transferred to ESRS G1 and should include only the principles, but not any detailed disclosure requirements like those in ESRS G1. The detailed disclosure requirements should then be eliminated in total (see Q6 and Q49 of 1A. Overall ESRS exposure Drafts relevance - Architecture).

DR 2-GOV 3 – Sustainability matters addressed by the undertaking’s administrative, management and supervisory bodies

The undertaking shall provide a description of the sustainability matters that were addressed by its administrative, management and supervisory bodies during the reporting period.

The principle to be followed under this disclosure requirement is to provide information on whether the administrative, management and supervisory bodies were adequately informed of the material sustainability-related impacts, risks and opportunities arising or developing during the reporting period. Equally what information and matters it actually spent time addressing, and whether it was able to fulfil its roles and responsibilities, as defined in its mandate and described under DR 2-GOV 1.

We note that the term “due diligence” is used in various contexts. It is mentioned in several places of the Standard without describing in more detail, which concrete requirements result from this term in a specific case.

It is unclear whether this statement refers to due diligence in relation to the upcoming CSDDD. As there is already a similar text in ESRS 1, there is no need for a similar disclosure requirement.

We think that guidance and examples would be useful and that a clean line of terminology is needed.

DR 2-IRO 1 – Description of the processes to identify material sustainability impacts, risks and opportunities

The undertaking shall provide a description of its processes to identify its sustainability impacts, risks and opportunities and assess which ones are material.

The principle to be followed under this disclosure requirement is to provide information on (i) how the undertaking is organising its identification and assessment and (ii) what is in the scope of its identification and assessment of sustainability matters.

DR 2-IRO 2 – Outcome of the undertaking’s assessment of material sustainability impacts risks and opportunities as identified by reference to and in compliance with sector-agnostic and sector-specific level ESRS

The undertaking shall provide a description of the outcome of its assessment processes by reference to mandatory disclosures under ESRS.

The principle to be followed under this disclosure requirement is to give a clear statement of sustainability matters, as addressed by all ESRS, that are material for the undertaking, and to give relevant explanations on (i) how the undertaking related to the material impacts, risks and opportunities identified by its assessment, (ii) when the undertaking has or will put in place initiative to modify its strategy and business model, in order to reduce or eliminate the risk or to benefit from the opportunity and/or in order to prevent and mitigate negative material impacts and enhance positive material impacts (see DR 2-SBM3 and 4), why this was the case and (iii) if and why certain mandatory disclosures are not material under the undertaking’ specific facts and circumstances and therefore disclosed as such.

We note that the assessment of impact on financial performance is difficult and that more guidance regarding this DR is needed.

DR 2-IRO 3 – Outcome of the undertaking’s assessment of material sustainability impacts risks and opportunities that are not covered by and ESRS (entity-specific level)

The undertaking shall provide a description of the outcome of its assessment process in relation to material impacts, risks and opportunities that are not addressed under mandatory disclosure and require entity-specific disclosure.

The principle to be followed under this disclosure requirement is to provide information (i) about all material impacts, risks and opportunities of the undertaking resulting from the undertaking’s specific facts and circumstances for which relevant disclosure requirements do not exist, and (ii) when the undertaking has or will put in place initiatives to modify its strategy and business model, in order to reduce or eliminate the risk or to benefit from the opportunity and/or in order to prevent and mitigate negative material impacts and enhance positive material impacts (see DR 2-SBM 3 and 4), about such impacts, risks and opportunities. For each sustainability matter in the scope of sustainability reporting, the undertaking shall assess which material impacts, risks and opportunities are not covered by ESRS and shall give rise to entity-specific disclosure.

3B. Adequacy of Disclosure Requirements – Environmental standards (1/5)

For the purpose of the questions included in this section, respondents are encouraged to consider the following:

- when sharing comments on a given Disclosure Requirement, and as much as possible, reference to the specific paragraphs being commented on should be included in the written comments;
- in the question asked, for each ESRS, about the alignment with international sustainability standards, these include but are not limited to the IFRS Sustainability Standards and the Global Reporting Initiative Standards. Other relevant international initiatives may be considered by the respondents. When commenting on this particular question, respondents are encouraged to specify which international standards are being referred to.

A complete index of Disclosure Requirements and their corresponding Application Guidance can be found in Appendix I – Navigating the ESRS.

DR E1-1 – Transition plan for climate change mitigation

The undertaking shall disclose its plans to ensure that its business model and strategy are compatible with the transition to a climate-neutral economy and with limiting global warming to 1.5 °C in line with the Paris Agreement.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the transition plan of the undertaking and its compatibility with limiting global warming to 1.5°C.

This disclosure requirement requires the assessment of quantitative and qualitative data. We recommend more guidance on the elements of the transition. In addition, we do have reservations regarding the transformation of qualitative data in a digital reporting taxonomy.

DR E1-2 – Policies implemented to manage climate change mitigation and adaptation

The undertaking shall disclose its policies related to climate change mitigation and its policies related to climate change adaptation.

The principle to be followed under this Disclosure Requirement is to provide an understanding of how the undertaking monitors and manages its GHG emissions, climate-related physical and transition risks and opportunities throughout the value chain.

We recommend permitting undertakings to define targets based on absolute and/or intensity measures, depending on the relevance of the specific sectors. In addition, the use of carbon credits and/or GHG removals should also be reported within this disclosure requirement.

DR E1-4 – Climate change mitigation and adaptation action plans and resources

The undertaking shall disclose its climate change mitigation and adaptation action plans and the resources allocated for their implementation.

The principle to be followed under this Disclosure Requirement is to provide transparency on the key actions taken and planned to achieve climate-related targets and to manage GHG emissions, transition and physical risks and opportunities, supporting the understanding of achieved performance improvements and the credibility of the undertaking's policies, strategy and business model with regards to climate change.

We recommend to limit the reporting requirement to the share of renewable and non-renewable energy. More details on the energy mix are already required within the reporting of the GHG emissions.

ESRS E1-6 requires the reporting on energy intensity per net turnover and a reconciliation of the net turnover reference to the most relevant amount presented in the financial statements. Besides the link to net turnover, energy efficiency is reflected in operating expenses. More guidance regarding the reconciliation to operating expenses is recommended. In addition, the relation of energy intensity to net turnover is not meaningful in all sectors. We recommend to consider to include this disclosure requirement in the sector-specific standards.

DR E1-9 – Scope 3 GHG emissions

The undertaking shall disclose its gross indirect Scope 3 GHG emissions in metric tons of CO2 equivalent. The principle to be followed under this Disclosure Requirement is to provide an understanding of the GHG emissions that occur in the undertaking's value chain beyond its Scope 1 and 2 GHG emissions. For many undertakings Scope 3 GHG emissions are the main component of the GHG inventory and an important driver of their transition risks.

The reporting of scope 3 emissions is not relevant for all sectors, bears the risk of multiple accounting within the value chain and depends on data availability. Mandatory reporting on scope 3 emissions should be required only for the relevant sectors. In addition, we recommend to align this disclosure requirement with the requirements of the EU-Taxonomy.

DR E1-10 – Total GHG emissions

The undertaking shall disclose its total GHG emissions in metric tons of CO₂ equivalent.

The principle to be followed under this Disclosure Requirement is to provide an overall understanding of the undertaking's GHG emissions and whether they occur from its own operations or the value chain. The disclosure is a prerequisite for measuring progress towards reducing GHG emissions in accordance with the undertaking's climate-related targets and EU policy goals as well as for the assessment of the undertaking's transition risks.

As there are not yet comprehensive consensus methods for accounting and reporting on GHG removals and storage available, we have strong reservations concerning the data availability and the data quality. GHG removals might be also more relevant for undertakings in specific sectors and should be regulated in the sector-specific standards.

Verification methods are highly dependent on clear guidance, rules and requirements. So far, it is almost impossible to rely on a consensus-based level of ambition regarding the quality of carbon removals.

DR E1-13 – GHG mitigation projects financed through carbon credits

The undertaking shall disclose the amount of GHG emission reductions or removals from climate change mitigation projects outside its value chain it has financed through the purchase of carbon credits.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the extent and quality of carbon credits the undertaking has purchased from the voluntary market and cancelled in the reporting period.

The disclosure requirements focus on quantitative information, although the quality of the underlying projects financed is of importance for the assessment. We recommend to add to the disclosure requirement the description of the main projects.

(Optional) DR E1-14 – Avoided GHG emissions from products and services

The undertaking may disclose its estimated total avoided GHG emissions from its products and services in metric tons of CO₂ equivalent.

The principle to be followed under this optional Disclosure Requirement is to provide transparency on the methodologies used and assumptions made by the undertaking when estimating and communicating about the impacts of their products and services on climate change in comparison to other products and services, or in comparison to a situation where their products and services would not exist, considering that there is currently no generally accepted framework for accounting and reporting on such avoided emissions.

The concept of avoided emissions replaces attributional accounting by consequential accounting and should not be set in context with the attributional disclosure of (yearly) GHG emission profiles from the organization. It is built on scenarios, life-cycle assessments, and artificial data compared to a hypothetical baseline. Therefore, we recommend to not address this topic in ESRS.

DR E1-15 – Potential financial effects from material physical risks

The undertaking shall disclose the estimated potential financial effects from its material physical risks.

The principle to be followed under this Disclosure Requirement is to provide an understanding of how material climate-related physical risks may affect the undertaking's performance and position over the short, medium and long term, considering that those potential future financial effects may not meet at the reporting date the recognition and measurement criteria set for assets and liabilities.

The reconciliation required by the disclosure requirement only refers to assets, liabilities and turnover, although the potential effects might not be reflected in these positions but might be reflected only in the budget of the undertakings. We recommend to provide more guidance and illustrative examples on what to report, if the potential financial effects are not reflected in assets, liabilities and turnover (i.e. effects on operating expenses, depreciation, investments, future revenue considered in impairment test models).

Determining the assets and business activities at material physical risk is very judgmental. We recommend to provide more guidance regarding the applicable frameworks and regulations. If there is insufficient guidance, companies will make different assumptions in the preparation of the disclosure. This will impair the verifiability, comparability and usefulness of the disclosures across different companies.

DR E1-16 – Potential financial effects from material transition risks

The undertaking shall disclose the estimated potential financial effects from material transition risks.

The principle to be followed under this Disclosure Requirement is to provide an understanding of how material climate-related transition risks may affect the undertaking's performance and position over the short, medium and long-term, considering that those potential future financial effects may not meet at the reporting date the recognition and measurement criteria set for assets and liabilities.

ESRS E2-7 depicts the connectivity between sustainability and financial reporting and requires undertakings to disclose financial effects from pollution-related impacts, risks and opportunities, whereas the description of the disclosure requirement also requires the disclosure of potential financial effects, recognizing the fact that those potential financial effects may not meet the recognition and measurement criteria set for financial reporting. We recommend to provide more guidance in the Application Guidance and the Basis for conclusions on the definition of the respective effects as well as on the reconciliation to financial reporting, while also considering that the potential effects might not be reflected in the financial statements, but might be reflected in the budget of the undertakings (i.e. effects on operating expenses, depreciation, investments, future revenue considered in impairment test models). As connectivity between sustainability and financial reporting is key element of the double materiality concept and the assessments of effects on the enterprise value of the undertaking, we recommend to align the respective guidance between all ESRS and provide illustrative examples.

DR E3-1 – Policies implemented to manage water and marine resources

The undertaking shall disclose its policies related to water and marine resources².

The principle to be followed under this disclosure requirement is to provide an understanding of how the undertaking monitors and manages its material water and marine resources impacts, risks and opportunities.

ESRS E3-3 requires undertakings to disclose water and marine resources action plans and resources allocated through which the undertaking works to prevent, mitigate and remedy material water and marine resources-related impacts, or seeks to achieve positive impacts, or to manage pollution-related risks and opportunities. We recommend to provide more guidance and to align these disclosure requirements with the reporting requirements in accordance with ESRS E2 Pollution.

ESRS E3-4 requires undertakings to provide an understanding of the water cycle at entity level. This level of granularity requires undertakings to provide long lists of their entities' performances, although sustainability reporting only needs to be provided on a consolidated Group level. We recommend to provide information on a regional level as different regions are differently affected.

DR E3-5 – Water intensity performance

The undertaking may provide information on its water intensity performance.

The principle to be followed under this disclosure requirement is to provide an understanding of how the undertaking is managing to decouple net turnover from the withdrawal, consumption and discharge of water.

ESRS E4-3 requires the mandatory reporting on performance measurement, although different sectors are affected differently. We recommend to include this disclosure requirement in the sector-specific standards and limit the sector-agnostic disclosure requirements to the description of strategy, impacts, risks and opportunities as well as action plans.

DR E4-4 – Biodiversity and ecosystems action plans

The undertaking shall disclose its biodiversity and ecosystems-related actions and action plans and allocation of resources to meet its policy objectives and targets.

The principle to be followed under this Disclosure Requirement is to provide transparency on the key actions taken and planned to achieve biodiversity and ecosystems-related targets and to manage related risks, impacts and opportunities.

DR E4-10 – Financial effects from biodiversity-related impacts, risks and opportunities

The undertaking shall disclose its financial effects of risks and opportunities arising from biodiversity-related impacts and dependencies.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the effects of risks and opportunities, arising from the undertaking's biodiversity-related impacts and dependencies, on the undertaking's development, performance and position over the short, medium and long term and therefore on its ability to create enterprise value, considering that those potential future financial effects may not meet at the reporting date the recognition criteria set for financial statements.

We recommend to provide more guidance in the Application Guidance and the Basis for conclusions on the definition of the respective effects as well as on the reconciliation to financial reporting, while also considering that the potential effects might not be reflected in the financial statements, but might be reflected in the budget of the undertakings (i.e., effects on operating expenses, depreciation, investments, future revenue considered in impairment test models). As connectivity between sustainability and financial reporting is key element of the double materiality concept and the assessments of effects on the enterprise value of the undertaking, we recommend to align the respective guidance between all ESRS and provide illustrative examples.

DR E5-1 – Policies implemented to manage resource use and circular economy

The undertaking shall disclose separately its policies (i) to decouple economic activity from extraction of non-renewable resources and (ii) for regeneration of renewable resources and ecosystems.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the undertaking's ability to transition away from extraction of virgin non-renewable resources and to implement practices that secure and contribute to the regeneration of the stock of renewable resources and the ecosystems they are part of.

ESRS E5-2 requires the mandatory reporting on performance measurement, although different sectors are affected differently. We recommend to include this disclosure requirement in the sector-specific standards and limit the sector-agnostic disclosure requirements to the description of strategy, impacts, risks and opportunities as well as action plans.

DR E5-3 – Resource use and circular economy action plans

The undertaking shall describe its resource use and circular economy-related action plans and the resources allocated to their implementation.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the measures taken to increase the share of circularity in the flows and to optimise the use of resources supporting the credibility of the undertaking's strategy to develop circular business models fostering the transition to a more circular economy.

ESRS E5-6 requires undertakings to disclose the amount of weight diverted from disposal by recovery operation type, classified as preparation for reuse, recycling and other recovery operations. We recommend to focus on the waste prepared or sorted for recycling, as the recycling process itself is in general not performed by the undertaking reporting.

DR E5-7 – Resource use optimisation

The undertaking shall provide information on its strategy to optimise resource use in creating circular business models.

DR E5-9 Financial effects from resource use and circular economy-related impacts, risks and opportunities

The undertaking shall disclose its financial effects of material risks and opportunities arising from resource use and circular economy-related impacts and dependencies.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the effects of material risks and opportunities, related to the undertaking's resource use and circular economy-related impacts and dependencies, on the undertaking's development, performance and position over the short-, medium- and long-term and therefore on its ability to create enterprise value, considering that those potential future financial effects may not meet at the reporting date the recognition criteria set for financial statements.

We recommend to provide more guidance in the Application Guidance and the Basis for conclusions on the definition of the respective effects as well as on the reconciliation to financial reporting, while also considering that the potential effects might not be reflected in the financial statements, but might be reflected in the budget of the undertakings (i.e., effects on operating expenses, depreciation, investments, future revenue considered in impairment test models). As connectivity between sustainability and financial reporting is key element of the double materiality concept and the assessments of effects on the enterprise value of the undertaking, we also recommend to align the respective guidance between all ESRS and provide illustrative examples.

3C. Adequacy of Disclosure Requirements – Social standards (1/4)

For the purpose of the questions included in this section, respondents are encouraged to consider the following:

- when sharing comments on a given Disclosure Requirement, and as much as possible, reference to the specific paragraphs being commented on should be included in the written comments,
- in the question asked, for each ESRS, about the alignment with international sustainability standards, these include but are not limited to the IFRS Sustainability Standards and the Global Reporting Initiative Standards. Other relevant international initiatives may be considered by the respondents. When commenting on this particular question, respondents are encouraged to specify which international standards are being referred to.

A complete index of Disclosure Requirements and their corresponding Application Guidance can be found in Appendix I – Navigating the ESRS.

DR S1-1 – Policies relate to own workforce

The undertaking shall state its policies that address the management of its material impacts on own workforce, as well as associated material risks and opportunities; and provide a summary of the content of the policies and how they are communicated.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the extent to which the undertaking has policies that address the identification, assessment, management and/or remediation of material impacts on the undertaking's own workforce specifically, as well as policies that cover impacts, risks and opportunities in one policy. It also aims to provide an understanding of how both

the internal organisation, and the workers whose interests they address, are made aware of their existence and content.

We think that the reasonable cost / benefit balance was not fully considered throughout the DRs of the social standards. Moreover, we suggest to consider more optional disclosures rather than mandatory DRs concerning the social standards.

The DRs go further than other international standards. We recommend to aim for the same level of detail as other international sustainability standards.

DR S1-2 – Processes for engaging with own workers and workers' representatives about impacts

The undertaking shall explain its general processes for engaging with its own workers and workers' representatives about actual and potential material impacts on its own workforce.

The principle to be followed under this Disclosure Requirement is to provide an understanding of how the undertaking engages, as part of its ongoing due diligence process, with its own workers and workers' representatives about material, actual and potential, positive and/or negative impacts that do, or may, affect its own workforce.

We think that the reasonable cost / benefit balance was not fully considered throughout the DRs of the social standards. Moreover, we suggest to consider more optional disclosures rather than mandatory DRs concerning the social standards.

We recommend to coordinate the implementation schedule and the definitions of the channels and processes regarding the engagement with the own workforce and workers' representatives with those of the CSDDD.

DR S1-3 – Channels for own workers and workers' representatives to raise concerns

The undertaking shall describe:

- the channels it has in place for own workers and workers' representatives to raise their concerns or needs directly with the undertaking, and / or
- the processes through which the undertaking supports the availability of such channels through the workplace of own workers, and
- how it monitors issues raised and addressed.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the formal means by which the undertaking's own workers and workers' representatives can make their concerns and needs known directly to the undertaking and/or through which the undertaking supports the availability of grievance mechanisms in the workplace of their own workers and workers' representatives, how follow up is done with these own workers and workers' representatives regarding the issues raised, and the effectiveness of these channels.

DR S1-4 - Targets related to managing material negative impacts, advancing positive impacts, and managing material risks and opportunities

The undertaking shall explain any outcome-oriented targets it may have related to:

1. Reducing negative impacts on its own workforce; and/or
2. Advancing positive impacts on its own workforce; and/or
3. Managing material risks and opportunities related to its own workforce.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the extent to which the undertaking is using outcome-oriented targets to drive and measure its progress in addressing its negative impacts and/or advancing positive impacts on its own workforce, and/or in managing material risks and opportunities related to its own workforce.

We think that the reasonable cost / benefit balance was not fully considered throughout the DRs of the social standards. Moreover, we suggest to consider more optional disclosures rather than mandatory DRs concerning the social standards.

We are concerned that the DR will not provide a comparable basis of information, if there are too many possibilities for individual decisions regarding the disclosures.

DR S1-5 – Taking action on material impacts on own workforce and effectiveness of those actions

The undertaking shall explain:

1. What action is planned or underway to prevent, mitigate or remedy material negative impacts on its own workforce that are connected to its operations, products or services;
2. Any additional initiatives or processes it has in place with the primary purpose of delivering positive impacts for its own workforce; and
3. How it assesses the effectiveness of these actions, programmes and processes in delivering outcomes or its own workforce.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the types of processes, initiatives or engagements through which the undertaking:

1. Works to prevent, mitigate and remedy material impacts on its own workforce; or
2. Seeks to achieve positive impacts for its own workforce, recognizing that in both instances, the ultimate aim is to deliver improved outcomes in workers' lives.

We think that the information regarding this DR should not be formalized too much.

We think that the reasonable cost / benefit balance was not fully considered throughout the DRs of the social standards. Moreover, we suggest to consider more optional disclosures rather than mandatory DRs concerning the social standards.

We recommend to coordinate the implementation schedule and the definitions of the channels and processes regarding the engagement with the own workforce and workers' representatives with those of the CSDDD.

We think that the information required by this disclosure requirement is very granular, a disclosure of the total number of headcount and of its breakdown by significant countries is already required under ESRS 2.

We state that standards should also refrain from defining specific thresholds, as it should be at the companies' discretion to determine what is of significance in relation to their activities. In addition, we think that there shall be a specification about the way figures should be reported, in headcount or FTE - otherwise disclosures are not comparable.

We think that the reasonable cost / benefit balance was not fully considered throughout the DRs of the social standards. Moreover, we suggest to consider more optional disclosures rather than mandatory DRs concerning the social standards.

We recommend to coordinate the implementation schedule and the definitions of the channels and processes regarding the engagement with the own workforce and workers' representatives with those of the CSDDD.

We state that a clear definition of workforce is needed to ensure comparability. To achieve comparability, the standards should prescribe FTE, headcount or manpower. We think that, depending on the methodology, it might seem that one company might have a much larger number of contractors as compared to another, but in terms of FTEs the difference might not be significant.

We are concerned that the digitalization was not considered during the preparation of the ESRS S1 and, therefore, recommend to provide more guidance on how to transform the required information into a digital reporting taxonomy.

The undertaking shall disclose the extent to which training and development is provided to its own workforce.

We see the necessity of a clear distinction between mandatory training vs. training helping skill development. As non-employees usually do not receive training and development in a company, we are unsure what should be reported in relation to non-employees.

The components to be included under training expenses should be defined more precisely. In addition, it should be clarified if all training should be included or only optional training, as some training might be mandatory.

We think that the reasonable cost / benefit balance was not fully considered throughout the DRs of the social standards. Moreover, we suggest to consider more optional disclosures rather than mandatory DRs concerning the social standards.

We think that a clear definition is necessary in order to be able to differentiate between contractors and non-employees. As the main text of the DR refers to employees and the AG refers to own workers the scope of this DR is unclear.

For the first year of implementation, we recommend to prioritise information regarding health and safety only, and to disclose the coverage of the management system at a later point.

We think that the reasonable cost / benefit balance was not fully considered throughout the DRs of the social standards. Moreover, we suggest to consider more optional disclosures rather than mandatory DRs concerning the social standards.

We are concerned that the digitalization was not considered during the preparation of the ESRS S1 and, therefore, recommend to provide more guidance on how to transform the required information into a digital reporting taxonomy.

3C. Adequacy of Disclosure Requirements – Social standards (2/4)

DR S1-11 – Performance of the health and safety management system

The undertaking shall disclose the number of incidents associated with work-related injuries, ill health and fatalities of its own workers.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the quality and performance of the established health and safety management system to prevent work-related incidents. The undertaking shall provide the following information to comply with paragraph this Disclosure Requirement:

- the number of fatalities as a result of work-related injuries and work-related ill health;
- the number and rate^[1] of recordable work-related injuries;
- the number of cases of recordable work-related ill health; and
- the number of days lost to work-related injuries and fatalities from work-related accidents, work-related ill health and fatalities from ill health.

[1] This information supports the information needs of financial market participants subject to Regulation (EU) 2019/2088 as reflecting an additional indicator related to principal adverse impacts as set out by indicator #2 in Table 3 of Annex 1 of the related Delegated Regulation with regard to disclosure rules on sustainable investments (“Rate of accidents”).

We think that the reasonable cost / benefit balance was not fully considered throughout the DRs of the social standards. Moreover, we suggest to consider more optional disclosures rather than mandatory DRs concerning the social standards.

We are concerned that the digitalization was not considered during the preparation of the ESRS S1 and, therefore, recommend to provide more guidance on how to transform the required information into a digital reporting taxonomy.

(Optional) DR S1-12 – Working hours

The undertaking shall disclose the percentage of its own workers that exceed 48 hours of work per week over the applicable reference period.

The principle to be followed under this Disclosure Requirement is to provide an understanding of whether the undertaking respects the thresholds established by the EU and ILO standards on weekly working hours (48 hours per week over a reference period) to protect own workers' physical and mental health and their safety and work-life balance.

We see some difficulties in collecting this information, as some operation sites use self-reporting or do not have standard working hours/flexible working systems. Therefore, we recommend providing further guidance how to consider certain differences throughout an undertaking. In addition, we recommend to differentiate between workers employed by the undertaking and others.

We think that the reasonable cost / benefit balance was not fully considered throughout the DRs of the social standards. Moreover, we suggest to consider more optional disclosures rather than mandatory DRs concerning the social standards.

We are concerned that the digitalization was not considered during the preparation of the ESRS S1 and, therefore, recommend to provide more guidance on how to transform the required information into a digital reporting taxonomy.

In the AG the term 'workers' is used, whereas the main disclosure text refers to employees. We recommend using an aligned scope for the DR and the AG. As there are also differences between workers employed by the undertaking and other workers regarding e.g. sabbaticals, we recommend to provide clear guidance regarding the scope of the disclosure.

We think that the reasonable cost / benefit balance was not fully considered throughout the DRs of the social standards. Moreover, we suggest to consider more optional disclosures rather than mandatory DRs concerning the social standards.

We are concerned that the digitalization was not considered during the preparation of the ESRS S1 and, therefore, recommend to provide more guidance on how to transform the required information into a digital reporting taxonomy.

DR S1-14 – Fair remuneration

We see the highly detailed disclosure requirements as a threat to the usability of ESRS. These may result in less focus on relevant information within the reporting. In addition, we think that a clear specification regarding the methodology is necessary to ensure comparability.

As fair remuneration is not cited in Art. 19b (2) lit b. ii) of the proposal of the CSRD, we question whether and to what extent a standard can require additional disclosures that go beyond the requirements of the CSRD-proposal.

We think that the reasonable cost / benefit balance was not fully considered throughout the DRs of the social standards. Moreover, we suggest to consider more optional disclosures rather than mandatory DRs concerning the social standards.

We are concerned that the digitalization was not considered during the preparation of the ESRS S1 and, therefore, recommend to provide more guidance on how to transform the required information into a digital reporting taxonomy.

DR S1-15 – Social security eligibility coverage

The undertaking shall disclose the percentage of its own workers eligible for social security.

The principle to be followed under this Disclosure Requirement is to understand whether there are own workers of the undertaking that are not eligible for social security and, as a result, are especially vulnerable to major social risks.

We are concerned that the disclosure could be difficult for companies operating in various jurisdictions. We recommend providing a clear definition of the components, which need to be included in social security, especially for companies also operating outside the EU. We are unsure whether companies will have a complete picture of employees who are ineligible to social security and whether this is a type of information that all companies can have access to. On the social security aspect, it will be important to understand what the policies, targets and actions are, which are taken by the company to improve access to social security, especially in areas with no statutory social insurance. Disclosures that are already covered under S1-1, S1-3, and S1-4 Paragraph 77 could be removed.

We think that the reasonable cost / benefit balance was not fully considered throughout the DRs of the social standards. Moreover, we suggest to consider more optional disclosures rather than mandatory DRs concerning the social standards.

We are concerned that the digitalization was not considered during the preparation of the ESRS S1 and, therefore, recommend to provide more guidance on how to transform the required information into a digital reporting taxonomy.

For the pay gap (para. 79 to 81) AG 145-147 must be observed, whereby AG 145 contains the calculation formula. It is positive to note that the hourly wage is targeted. However, it would be desirable that a regional breakdown is possible. It could be possible that the gender distribution differs from region to region and that this leads to distortions. Different management levels should also be considered. While it is possible to provide explanations, these are likely to be lost using electronic tagging (digital taxonomy).

In order to provide reasonable, digital reporting taxonomy information, we recommend breaking down the global figure of pay gap, e.g., by employee category and/or by country of the undertaking's operations.

We recommend defining gross hourly earnings more precisely and to define whether overtime, bonuses and other remuneration parts must be included on a pro rata basis or not.

How to deal with additional (fluid) genders remains unanswered.

DR S1-17 – Annual total compensation ratio

The undertaking shall disclose the ratio between the compensation of its highest paid individual and the median compensation for its employees.

We see the need for a definition of total compensation. Additionally, there should be guidance for procedures, if the highest paid individual at year-end only recently came into that position.

We think that the reasonable cost / benefit balance was not fully considered throughout the DRs of the social standards. Moreover, we suggest to consider more optional disclosures rather than mandatory DRs concerning the social standards.

We think that the DR leaves a lot of room for companies to interpret what 'good' performance is. Therefore, the reporting regarding this DR could vary widely, e.g., some companies might want a small number of incidents and, thus, discourage reporting. We recommend requiring a breakdown of alleged incidents vs. investigated and justified incidents and any corrective action.

We propose to align the definition of discrimination with the ILO instruments referenced in the GRI Standards.

We think that the reasonable cost / benefit balance was not fully considered throughout the DRs of the social standards. Moreover, we suggest to consider more optional disclosures rather than mandatory DRs concerning the social standards.

We are concerned that the digitalization was not considered during the preparation of the ESRS S1 and, therefore, recommend to provide more guidance on how to transform the required information into a digital reporting taxonomy.

We see the necessity for a definition of disability. The definition can vary from country to country. Since this kind of information is usually collected within human resources departments with labour law experts involved, the local definitions do matter. We recommend to set a definition as opposed to leave this matter open to interpretation, as in the later case comparability will be very hard to ensure.

We think that the reasonable cost / benefit balance was not fully considered throughout the DRs of the social standards. Moreover, we suggest to consider more optional disclosures rather than mandatory DRs concerning the social standards.

The undertaking shall disclose information on benefits which are standard for full-time permanent employees but are not provided to employees with temporary, part-time and non-guaranteed hour contracts. We think that the reasonable cost / benefit balance was not fully considered throughout the DRs of the social standards. Moreover, we suggest to consider more optional disclosures rather than mandatory DRs concerning the social standards.

We are concerned that the digitalization was not considered during the preparation of the ESRS S1 and, therefore, recommend to provide more guidance on how to transform the required information into a digital reporting taxonomy.

3C. Adequacy of Disclosure Requirements – Social standards (3/4)

DR S1-21 – Grievances and complaints related to other work-related rights

The undertaking shall state the number of grievances and complaints received and resolved relating to workers' other work-related rights.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the undertaking's grievance mechanism or channel. This is the mechanism or channel through which those workers whose other work-related rights are impacted by the undertaking are able to lodge a concern or complaint, and that can provide access to remedy by resolving those complaints. Furthermore, it is to provide an understanding of the number of complaints raised and resolved at National Contact Points for OECD Multinationals.

We are concerned that the draft standard does not detail the existence of unions that only represent company interests (i.e., yellow unions). Therefore, there is a possibility that a company engages with unions to a high percentage, but that this fact is illegitimate in terms of really representing workers' interests. Coverage ratios might be needed to refer to different regional standards, if group standards do not specify.

We think that the reasonable cost / benefit balance was not fully considered throughout the DRs of the social standards. Moreover, we suggest to consider more optional disclosures rather than mandatory DRs concerning the social standards.

The undertaking shall disclose the extent and functioning of social dialogue with workers' representatives of its own workforce.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the extent to which the institutional prerequisites for social dialogue in the undertaking exist and the extent to which rights to social dialogue are respected in the undertaking's operations, particularly for those which are located in the European Economic Area (EEA).

We see the necessity for a more detailed definition of "severe human rights issues" and also for a non-exhaustive list which should also include discriminatory behaviour.

We see the necessity for a clear definition of 'personal data'. For instance, the European Court of Justice has at times interpreted this broadly to include work breaks taken by employees. Thus, it needs to be clarified, whether monitoring the time, when employees are logging in to their computers while working from home, is a form of surveillance that would fall under this DR or not.

We think that the reasonable cost / benefit balance was not fully considered throughout the DRs of the social standards. Moreover, we suggest to consider more optional disclosures rather than mandatory DRs concerning the social standards.

We are concerned that the digitalization was not considered during the preparation of the ESRS S1 and, therefore, recommend to provide more guidance on how to transform the required information into a digital reporting taxonomy.

DR S2-1 - Policies related to value chain workers

The undertaking shall state its policies that address the management of its material impacts on value chain workers, as well as associated material risks and opportunities; and provide a summary of the content of the policies and how they are communicated.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the extent to which the undertaking has policies that address the identification, assessment, management and/or remediation of material impacts on value chain workers specifically, as well as policies that cover material risks or opportunities related to value chain workers, or policies that cover impacts, risks and opportunities in one policy. It also aims to provide an understanding of how both the internal organisation, and the value chain workers whose interests they address, are made aware of their existence and content.

The DRs in ESRS S2 cover workers in the value chain, however, the paragraph 15 (a) & (c) in the DR covers all stakeholders. We propose to align the scope to the cross-cutting standards.

We think that the reasonable cost / benefit balance was not fully considered throughout the DRs of the social standards. Moreover, we suggest to consider more optional disclosures rather than mandatory DRs concerning the social standards.

We are concerned that the digitalization was not considered during the preparation of the ESRS S2 and, therefore, recommend to provide more guidance on how to transform the required information into a digital reporting taxonomy.

DR S2-2 - Processes for engaging with value chain workers about impacts

The undertaking shall explain its general processes for engaging with value chain workers and their representatives about actual and potential material impacts on them.

The principle to be followed under this Disclosure Requirement is to provide an understanding of how the undertaking engages, as part of its ongoing due diligence process, with value chain workers and related trade union and worker representatives about material actual and potential positive and/or negative impacts that do or may affect them, and whether and how perspectives of value chain workers are taken into account in the decision-making processes of the undertaking.

DR S2-3 – Channels for value chain workers to raise concerns

The undertaking shall describe:

1. the channels it has in place for value chain workers to raise their concerns or needs directly with the undertaking; and/or
2. the processes through which the undertaking supports the availability of such channels through the workplace of value chain workers; and
3. how it monitors issues raised and addressed.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the formal means by which value chain workers can make their concerns and needs known directly to the undertaking and/or through which the undertaking supports the availability of grievance mechanisms in the workplace of value chain workers, how there is follow up with these workers regarding the issues raised and the effectiveness of these channels.

We believe that it should be reported how often different channels have been used in order to give an idea about the usability and effectiveness of the structures implemented.

This could also emphasise the understanding that channels can be used without risk of any retaliation.

We think that the reasonable cost / benefit balance was not fully considered throughout the DRs of the social standards. Moreover, we suggest to consider more optional disclosures rather than mandatory DRs concerning the social standards.

We are concerned that the digitalization was not considered during the preparation of the ESRS S2 and, therefore, recommend to provide more guidance on how to transform the required information into a digital reporting taxonomy.

DR S2-4 - Targets related to managing material negative impacts, advancing positive impacts, and managing material risks and opportunities

The undertaking shall explain the outcome-oriented targets it may have related to:

1. reducing negative impacts on value chain workers; and/or
2. advancing positive impacts on value chain workers; and/or
3. managing material risks and opportunities related to value chain workers.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the extent to which the undertaking is using outcome-oriented targets to drive and measure its progress in addressing negative impacts, and/or advancing positive impacts, on value chain workers, and/or in managing material risks and opportunities related to value chain workers.

We think that it is uncertain that those common targets used in procurement departments as supplier audits and supplier engagements show the positive and negative benefit, as they are only tangential and often cannot be accurately measured in a way that would be auditable.

We think that the reasonable cost / benefit balance was not fully considered throughout the DRs of the social standards. Moreover, we suggest to consider more optional disclosures rather than mandatory DRs concerning the social standards.

We are concerned that the digitalization was not considered during the preparation of the ESRS S2 and, therefore, recommend to provide more guidance on how to transform the required information into a digital reporting taxonomy.

3C. Adequacy of Disclosure Requirements – Social standards (4/4)

DR S2-5 - Taking action on material impacts on value chain workers and effectiveness of those actions

The undertaking shall explain:

1. what action is planned or underway to prevent, mitigate or remedy material negative impacts on value chain workers that are connected to its operations, products or services;
2. any additional initiatives or processes it has in place with the primary purpose of delivering positive impacts for value chain workers; and
3. how it assesses the effectiveness of these actions, programmes and processes in delivering intended outcomes for value chain workers.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the types of process, initiative or engagement through which the undertaking (a) works to prevent, mitigate and remedy material impacts on value chain workers, or (b) seeks to achieve positive impacts for value chain workers, recognising that in both instances, the ultimate aim is to deliver improved outcomes in workers' lives.

The undertaking shall explain:

1. what action is planned or underway to mitigate material risks for the undertaking arising from its impacts and dependencies on value chain workers; and
2. what action is planned or underway to pursue material opportunities for the undertaking in relation to value chain workers.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the ways in which the undertaking is addressing the material risks and pursuing the material opportunities related to workers in its value chain.

DR S3-1 – Policies related to affected communities

The undertaking shall state its policies that address the management of its material impacts on communities, as well as associated material risks and opportunities; and provide a summary of the content of the policies and how they are communicated.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the extent to which the undertaking has policies that address the identification, assessment, management and/or remediation of material impacts on local communities specifically, as well as policies that cover material risks or opportunities related to affected communities, or policies that cover impacts, risks and opportunities in one policy. It also aims to provide an understanding of how both the internal organisation, and the local communities whose interests they address, are made aware of their existence and content.

DR S3-2 – Processes for engaging with affected communities about impacts

The undertaking shall explain its general processes for engaging with affected communities and their representatives about actual and potential material impacts on them.

The principle to be followed under this Disclosure Requirement is to provide an understanding of how the undertaking engages as part of its ongoing due diligence process with affected communities about material actual and potential positive and/or negative impacts that do or may affect them, and whether and how perspectives of affected communities are taken into account in the decision-making processes of the undertaking.

1. the channels it has in place for affected communities to raise their concerns or needs directly with the undertaking; and/or
2. the processes through which the undertaking supports the availability of such channels by its business relationships; and
3. how it monitors issues raised and addressed.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the formal means by which affected communities can make their concerns and needs known directly to the undertaking, and/or through which the undertaking supports the availability of mechanisms by its business relationships, how there is follow up with these communities regarding the issues raised, and the effectiveness of these channels.

We think that the reasonable cost / benefit balance was not fully considered throughout the DRs of the social standards. Moreover, we suggest to consider more optional disclosures rather than mandatory DRs concerning the social standards.

We are concerned that the digitalization was not considered during the preparation of the ESRS S3 and, therefore, recommend to provide more guidance on how to transform the required information into a digital reporting taxonomy.

DR S3-6 - Approaches to mitigating material risks and pursuing material opportunities related to affected communities

The undertaking shall explain:

1. what action is planned or underway to mitigate material risks for the undertaking arising from its impacts and dependencies on local communities; and
2. what action is planned or underway to pursue material opportunities for the undertaking in relation to local communities.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the ways in which the undertaking is addressing the material risks and pursuing the material opportunities related to affected communities.

DR S4-1 – Policies related to consumers and end-users

The undertaking shall state its policies that address the management of its material impacts of its products and/or services on consumers and end-users, as well as associated material risks and opportunities; and provide a summary of the content of the policies and how they are communicated.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the extent to which the undertaking has policies that address the identification, assessment, management and/or remediation of impacts on consumers and end-users specifically, as well as policies that cover material risks or opportunities related to consumers and end-users, or policies that cover impacts, risks and opportunities in one policy. It also aims to provide an understanding of how both the internal organisation, and the consumers and end-users whose interests they address, are made aware of their existence and content.

DR S4-2 – Processes for engaging with consumers and end-users about impacts

The undertaking shall explain its general processes for engaging with consumers and end-users and their representatives about actual and potential material impacts on them.

The principle to be followed under this Disclosure Requirement is to provide an understanding of how the undertaking engages as part of its ongoing due diligence process with consumers and end-users about material actual and potential positive and/or negative impacts that do or may affect them, and whether and how perspectives of consumers and end-users are taken into account in the decision-making processes of the undertaking.

DR S4-3 – Channels for consumers and end-users to raise concerns

The undertaking shall describe:

1. the channels it has in place for consumers and end-users to raise their concerns/complaints or needs directly with the undertaking; and/or
2. the processes through which the undertaking supports the availability of mechanisms by its business relationships; and
3. how it monitors issues raised and addressed.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the formal means by which consumers and end-users can make their concerns and needs known directly to the undertaking and/or through which the undertaking supports the availability of mechanisms by its business relationships, how there is follow up with these consumers and end-users regarding the issues raised, and the effectiveness of these channels.

DR S4-4 – Targets related to managing material negative impacts, advancing positive impacts, and managing material risks and opportunities

The undertaking shall explain the outcome-oriented targets it may have related to:

1. reducing negative impacts on consumers and end-users; and/or
2. advancing positive impacts on consumers and end-users; and/or
3. managing material risks and opportunities.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the extent to which the undertaking is using outcome-oriented targets to drive and measure progress in addressing negative impacts, and/or advancing positive impacts, on consumers and end-users.

DR S4-5 – Taking action on material impacts on consumers and end-users and effectiveness of those actions

The undertaking shall explain:

1. what action is planned or underway to prevent, mitigate or remedy material negative impacts on consumers and end-users who are connected to its operations, products or services;
2. any additional initiatives or processes it has in place with the primary purpose of positively contributing to improved social outcomes for consumers and end-users; and
3. how it assesses the effectiveness of these actions, programmes and processes in contributing to intended outcomes for consumers and end-users.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the types of process, initiative or engagement through which the undertaking:

1. works to prevent, mitigate and remedy material impacts on consumers and end-users, and
2. seeks to achieve positive impacts for consumers and end-users, recognising that in both instances, the ultimate aim is to deliver improved outcomes for consumers' and end-users' lives.

3D. Adequacy of Disclosure Requirements – Governance standards (1/2)

For the purpose of the questions included in this section, respondents are encouraged to consider the following:

- when sharing comments on a given Disclosure Requirement, and as much as possible, reference to the specific paragraphs being commented on should be included in the written comments,
- in the question asked, for each ESRS, about the alignment with international sustainability standards, these include but are not limited to the IFRS Sustainability Standards and the Global Reporting Initiative Standards. Other relevant international initiatives may be considered by the respondents. When commenting on this particular question, respondents are encouraged to specify which international standards are being referred to.

A complete index of Disclosure Requirements and their corresponding Application Guidance can be found in Appendix I – Navigating the ESRS.

DR G1-1 – Governance structure and composition

The undertaking shall provide information on its governance structure and composition.

The principle to be followed under this Disclosure Requirement is to provide an understanding of the structure and composition of the governance and the distribution of roles and responsibilities throughout the undertaking's organisation, from its administrative, management and supervisory bodies to its executive and operational levels.

As we explain in our response to Q6 in "1A. Overall ESRS exposure Drafts relevance – Architecture", we recommend eliminating all DRs in ESRS G1 and instead transferring the governance-related DRs 2-GOV to ESRS G1.

DR G1-2 – Corporate governance code or policy

The undertaking shall disclose the corporate governance code, policy or practices that determine the function of its administrative, management or supervisory bodies.

The principle to be followed under this Disclosure Requirement is to provide information about any legal or regulatory requirements that mandate and influence the design of the governance structure of the undertaking, together with information on aspects implemented that are over and above any relevant legal or regulatory requirements.

For part E, please explain why costs would be unreasonable and / or what particular benefit this disclosure requirement offers

For part F, please specify what existing European sustainability reporting obligation you think the disclosure requirements misses to address adequately

For part G, please explain how you think further alignment could be reached

Please share any comment and suggestion for improvement you might have relating to the above questions, referring explicitly to the part of the question you are providing comment to

As we explain in our response to Q6 in "1A. Overall ESRS exposure Drafts relevance – Architecture", we recommend eliminating all DRs in ESRS G1 and instead transferring the governance-related DRs 2-GOV to ESRS G1.

DR G1-3 – Nomination process

The undertaking shall provide information about the nomination and selection processes for its administrative, management and supervisory bodies.

The principle to be followed under this Disclosure Requirement is to provide information about the criteria used for selecting and nominating the members of the undertaking's administrative, management and supervisory bodies.

For part F, please specify what existing European sustainability reporting obligation you think the disclosure requirements misses to address adequately

For part G, please explain how you think further alignment could be reached

Please share any comment and suggestion for improvement you might have relating to the above questions, referring explicitly to the part of the question you are providing comment to

The disclosure requirements leave room for misinterpretation, as there are no references to any minimum requirements regarding the reduction of the risks of unethical behaviour.

We recommend that the statements in disclosure requirement 20 b) and d) shall be positively worded.

The information requested is auditable, yet, specifications are needed as to how to facilitate assurance.

DR G2-3 – Prevention and detection of corruption and bribery

The undertaking shall provide information about its system to prevent and detect, investigate, and respond to allegations or incidents relating to corruption and bribery.

The principle to be followed under this disclosure requirement is to provide transparency on the key procedures of the undertaking to prevent and detect, investigate and respond to corruption or bribery-related incidents or allegations.

The individual disclosure requirements are too detailed. We do not believe that the disclosure of such detailed information is relevant and practical.

We recommend limiting the disclosure requirements to “substantiated” allegations in order to avoid useless information.

DR G2-4 – Anti-competitive behaviour prevention and detection

The undertaking shall provide information about its system to prevent and detect, investigate, and respond to allegations or incidents relating to anti-competitive behaviour.

The principle to be followed under this disclosure requirement is to provide transparency on the key procedures of the undertaking to prevent and detect, investigate and respond to allegations or incidents of anti-competitive behaviour.

We point out that the reference to G2-3, para 24 is unsuitable because the internal procedures and legal measures concerning anti-competitive behaviour are different from those concerning corruption and bribery and are handled on a different (mostly top) management level.

DR G2-5 – Anti-corruption and anti-bribery training

The undertaking shall provide information about any anti-corruption and anti-bribery training programmes offered.

The principle to be followed under this disclosure requirement is to provide an understanding of the undertaking's training and educational initiatives to develop and maintain awareness related to anti-corruption or anti-bribery and business conduct within the undertaking as well as in the value chain.

The disclosure requirements are too detailed. We do not believe that the disclosure of such detailed information is relevant and practical.

Points 34 and 35 contain the wording “shall/should consider”. We recommend deleting those requirements as they are only recommendations.

DR G2-6 – Corruption or bribery events

The undertaking shall provide information on legal proceedings related to corruption or bribery during the reporting period.

We are concerned about the lack of a clear definition of “legal proceedings”. We recommend specification whether this includes any type of an “event” or only “initiated procedures”.

DR G2-7 – Anti-competitive behaviour events

The undertaking shall provide information on any publicly announced investigation into or litigation concerning possible anti-competitive behaviour it is facing during the reporting period.

The disclosure requirement is too detailed. We do not believe that the disclosure of such detailed information is relevant and practical.

DR G2-8 – Beneficial ownership

The undertaking shall provide information about its beneficial owners (as defined in article 3(6) of Directive (EU) 2015/849) and control structure.

The principle to be followed under this disclosure requirement is to provide transparency on the individuals who ultimately own or control the undertaking's organisational and control structure, including beneficial owners.

We are in favour of transparency regarding lobbying activities and political engagement. Yet, we doubt the usefulness of the required information for achieving the main purpose of the CSRD. We recommend evaluating whether a prioritisation at this stage is necessary.

DR G2-10 – Payment practices

The undertaking shall provide information on the payment practices to support transparency about these practices given the importance of timely cash flows to business partners.

The principle to be followed under this disclosure requirement is to provide insights on the contractual payment terms and the average actual payments.

We see the importance of the disclosure of “payment practices”, but do not understand why “payment practices” was picked as a KPI since also other KPIs are suitable to assess the conduct towards business partners. We suggest providing general information instead.

Payment delays complicate the financial management of undertakings, especially SMEs[1], who rely on predictable flows of cash to operate. According to the relevant EU legislation (Directive 2011/7/EU) a payment is late when the creditor has not received the funds at the expiry of the period negotiated in the contract. And yet, even payments performed within the contractually negotiated period can hide unfair payment practices. Very often businesses accept payment terms longer than they are comfortable with[2], as such terms may reflect the one party’s power compared to the other, such as by virtue of its size or brand.

[1] SMEs (Small and Medium-sized enterprises) are defined according to the Commission Recommendation 2003/361/EC https://ec.europa.eu/growth/smes/sme-definition_en

[2] According to the Intrum European payment Report 2021, on average 49% of businesses in the EU accepted payment terms longer than they are comfortable with out of fear of losing their customers or damaging business relations.

Q137: do you consider that the indicators in G2-10 (in isolation or jointly) capture the following sufficiently:

	Yes	No	No opinion
the extent to which accounts payable or creditors at period end have been outstanding	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>
the fairness of the undertaking’s payment practices	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>

If not, please provide your rationale and indicate the sector(s) for which you deem add-ons necessary.

No, these indicators are only a part of the possible information and may not provide a full picture of the topic. We suggest to not specify individual indicators.

Q 138: what alternative indicators would you propose? Please specify whether your proposal(s) are of sector-agnostic or sector-specific nature.
